

From the Office of Emergency Management:

Previously the Bent County Emergency Sirens for the County have been tested each Monday at noon with a steady Tone lasting over 2.5 minutes. After listening to concerns from our citizens, we will no longer be testing the Emergency Sirens with a steady tone. Although we will continue to test the Sirens each Monday at noon, we will now be bumping the system resulting in a Growl type of sound lasting approximately 20 seconds. This will continue to ensure that the Emergency Sirens are fully functional.

Troy Abdulla, Bent County Emergency Manager
